Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to mechanical variations of an electronic camera display, classified in class 348, subclass 333.06.
- II. Claims 13-20, drawn to variations of display formats in an electronic camera view finder, classified in class 348, subclass 333.12.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as it can be used in any electronic camera view finder and does not need the display to be oriented in various manners. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

During a telephone conversation with John Torrente on January 3, 2003 a provisional election was not made to prosecute the invention of groups I or II, claim 1-12 and 13-20 respectively. Upon applicants request this restriction is to be mailed for election considerations.
